### A Special Note...

Dear Dr. Manrique,

We just wanted to thank you again for letting us help in your study!!

I wanted to let you know that I know how the vines started. 40 years ago I brought them from our beach house, to our new home in the St. Pete. "Jungle Area" neighborhood. At the beach, we used the vines to cover our mailboxes by the road. We trimmed them etc. My Mom told me NOT to bring any potatoes ~~to~~ <sup>when we</sup> moved. I didn't listen (of course) I had a bag of maybe 4 or 5 potatoes. They started sprouting →

in the dark of our garage. Then I  
planted them along our fence.

I deeply regret not listening to my  
mother's advise! My kids understand  
the lesson as well. We spend many  
hours in the winter collecting  
potatos. Always listen to the  
mother for sure!

We hope our beetle friends  
will help us out! ☺

Thank you!

Lori Leadbetter
